

ERITECH a.s. provides its customers with comprehensive services in the field of engineering, development and supply of technological equipment in the field of waste management and material handling. Our focus is mainly on design activities, supply and installation of technological systems, but also individual products, as well as purchase, sale, comprehensive service in the field of waste management.

We are committed to conducting our business safely, openly, and responsibly and in a sustainable manner, always in accordance with the requirements of ISO 9001: 2015 Quality Management System (QMS), ISO 45001: 2018 Occupational Health and Safety Management System (HSMS), ISO 14001: 2015 Environmental Management System (EMS) and in accordance with our principles.

## BUILDING LASTING VALUES THROUGH MODERN APPROACHES

- 1. Providing the highest quality products and corresponding services to all customers, with regard to their needs and expectations, within relevant designated internal and external aspects.**
- 2. Continuously develop and apply a positive culture of safety and health at work. Create a safe and health-free working environment and working conditions with an emphasis on the prevention of injuries and damage to health**
- 3. Use natural resources efficiently and reduce their consumption. at the same time minimize waste production, water consumption and energy consumption.**
- 4. Responsibly use their manufacturing premises to protect environmental ecosystems**

**Eritech a.s. will implement all the above activities when respecting all its binding obligations, in the context of continuous improvement. The limits of applicability of the systems are determined in the scope of operations in Prague and Chrudim.**

**Eritech a.s. will allocate the necessary resources and will ensure the availability of the necessary information. The framework for rational, efficient and continuous improvement of the established management systems will be implemented in the form of annual objectives.**
